PROFESSIONAL SUMMARY

Design Engineer with 3 years of experience working across UX, product design, and full stack engineering. I design accessible, user-centric interfaces, maintain design systems, and focus on reducing friction between design and engineering.

EDUCATION

B.S. in Computer Science, Minor in Human Computer Interaction
Virginia Polytechnic Institute and State University

Graduated May 2023

PROFESSIONAL EXPERIENCE

Software Engineer I (Front-End / Full-Stack / Product Design)

June 2023 - February 2026

CoStar Group, Arlington VA

- Owned features within the Sync Portal (TypeScript/Remix) end to end, from wireframes and Figma prototypes through scalable, accessible React components (ARIA/WCAG compliant) to fully implemented pages, optimizing the design-to-production pipeline for B2B platforms.
- Maintained CoStar Sync, a near-real-time ETL platform using C#, .NET, AWS, and Kafka, supporting billions of daily data mutations across the ecosystem.
- Designed and led an intro to Figma workshop for a 30+ person backend engineering org, enabling broader cross-functional collaboration between design and engineering.
- Designed and implemented a build log dashboard where users select models that are auto-scheduled in optimal order, cutting a manual process to seconds; job views pulled in Azure builds, Datadog logs, and ownership info for full visibility.
- Mentored and onboarded 1 new hire and 1 intern on Figma workflows and coding practices.

SELECTED PROJECTS

Mint Condition

- Designed and built a Chrome extension surfacing sustainability scores and secondhand eBay alternatives on retail product pages, solving a recurring pain point of cross-referencing brand ethics and resale across separate tabs.
- Owned the interface and decision logic, including a five-tier sustainability rating system, using Claude Code to implement the backend (Cloudflare Workers, eBay Browse API, WikiRate data); shipped and live on the Chrome Web Store.
- Searches 1B+ eBay listings, returning 20 matches, typically in under 2 seconds.

CORE & TECHNICAL SKILLS

Languages: React, Remix, TypeScript, JavaScript, HTML, CSS, C#, .NET, Python, C++, Java

Design & Prototyping: Figma, Storybook, Canva

Tools: Claude Code, Copilot, Git, Dynamo, S3, OpenSearch, Snowflake, SQS, Docker, Jenkins

LEADERSHIP & ORGANIZATIONS

Executive Director

March 2020 - February 2023

HackViolet Hackathon

- Directed a 15-member executive board to execute a 500+ participant hackathon that produced 100+ hacker projects, securing \$30,000+ in corporate sponsorships and managing cross-functional coordination across PR, sponsorship, and logistics teams.
